CHARGING YOUR POCKET JUICE CHARGER

Your Pocket Juice charger comes pre-charged. Some of its battery life may have discharged during transit, in which case you should fully charge the unit before using it for the first time.

Quick Power Test: To test your charger's battery level, press the Power ON/OFF button and refer to the battery level chart.

CHARGING VIA AN AC WALL ADAPTER

Using the provided Micro-USB cable, connect your charger to an AC Wall adapter, then plug it into a wall outlet.

CHARGING VIA USB

Using the provided Micro-USB cable, connect your charger to a USB power source.

NOTE: Do not throw out Micro-USB cables.

It takes approximately 3-5 hours to fully charge a Pocket Juice Slim Pro from a depleted battery level. Once the charging process begins, the LED Indicator Lights will illuminate according to the current power level (see chart).

During the charging process, the LED Indicator Lights will remain lit until you disconnect your unit from the power supply.

NOTE: When fully charged, the Pocket Juice 5,000 mAh Portable Charger can power most devices up to 1.5 times. The number of charges depend on your device's battery capacity and the condition of your Pocket Juice.

CHARGING YOUR SMARTPHONE OR OTHER PORTABLE DEVICES

To achieve the best performance, make sure your Pocket Juice power bank is fully charged. Refer to the previous page for charging instructions.

1. Connect one end of a USB charging cable (such as your device's original cable) to your mobile device and the other end to your Pocket Juice charger.
2. Turn your power bank on by pressing the Power ON/OFF button. The charging process will begin immediately. Charging times vary by device (your device will display the charging progress).
3. Once your device is fully charged, disconnect it from the Pocket Juice.

SPECIFICATIONS

Battery Capacity: 5,000 mAh
Battery Type: Rechargeable Lithium-Polymer (Internal Battery)
Input: 5V/1A
Output: 5V/1A Max

SAFEGUARDS

- Do not strike or apply strong pressure to the unit with sharp or heavy objects. Strong impacts and shocks can cause irreversible damage to the unit.
- Do not operate if the unit has been exposed to any kind of liquid or if it is visibly wet or damp.
- The unit should always be charged under adult supervision. Never leave the unit with children unattended.
- Always remember to turn the unit off when it is not in use.
- Do not expose the unit to extremely high or low temperatures or high pressure. Avoid exposure to direct sunlight, fire, or locations such as the inside of a hot car. Such exposures may cause the battery to generate heat, ignite, or explode. Using the unit in this manner may also result in a loss of performance or a shortened life expectancy.
- Do not attempt to disassemble or modify the unit in any way. Doing so violates any warranty in place.
- Immediately discontinue use if, while charging or storing, the battery emits an unusual odor or smoke, feels hot, appears to have changed in color or shape, or appears abnormal in any other way.
